

Chain, Necklace & Pendant/Chain Lengths

Length is the first decision when buying a chain. Before the link style, before the metal, before the width, what decides how the whole piece wears are how long it is and where it sits.

LENGTH	CENTIMETERS	WHERE IT SITS
20"	50.8cm	Just below the collarbone. Everyday default look.
22"	55.8cm	Near the upper chest.
24"	60.96cm	Lower chest. Shows long on build under 6ft.
26"	66.04cm	Long and near sternum.

Most men wear 22" or 24". However, your selection is based on your height, styling requirements.
